

An aerial photograph of a coastal area. In the foreground, there is a large body of water with a greenish tint. A long, narrow breakwater or pier extends from the shore into the water. On the right side, a tall, white lighthouse stands on a rocky outcrop. The background shows a line of trees and some buildings. The image is partially obscured by a dark grey diagonal overlay on the left side.

# Esri Remote Sensing APPathon a.k.a. Web AppBuilder with support for Image Services

Cody Benkelman & Kushagra Patel

Esri Imaging and Mapping Forum

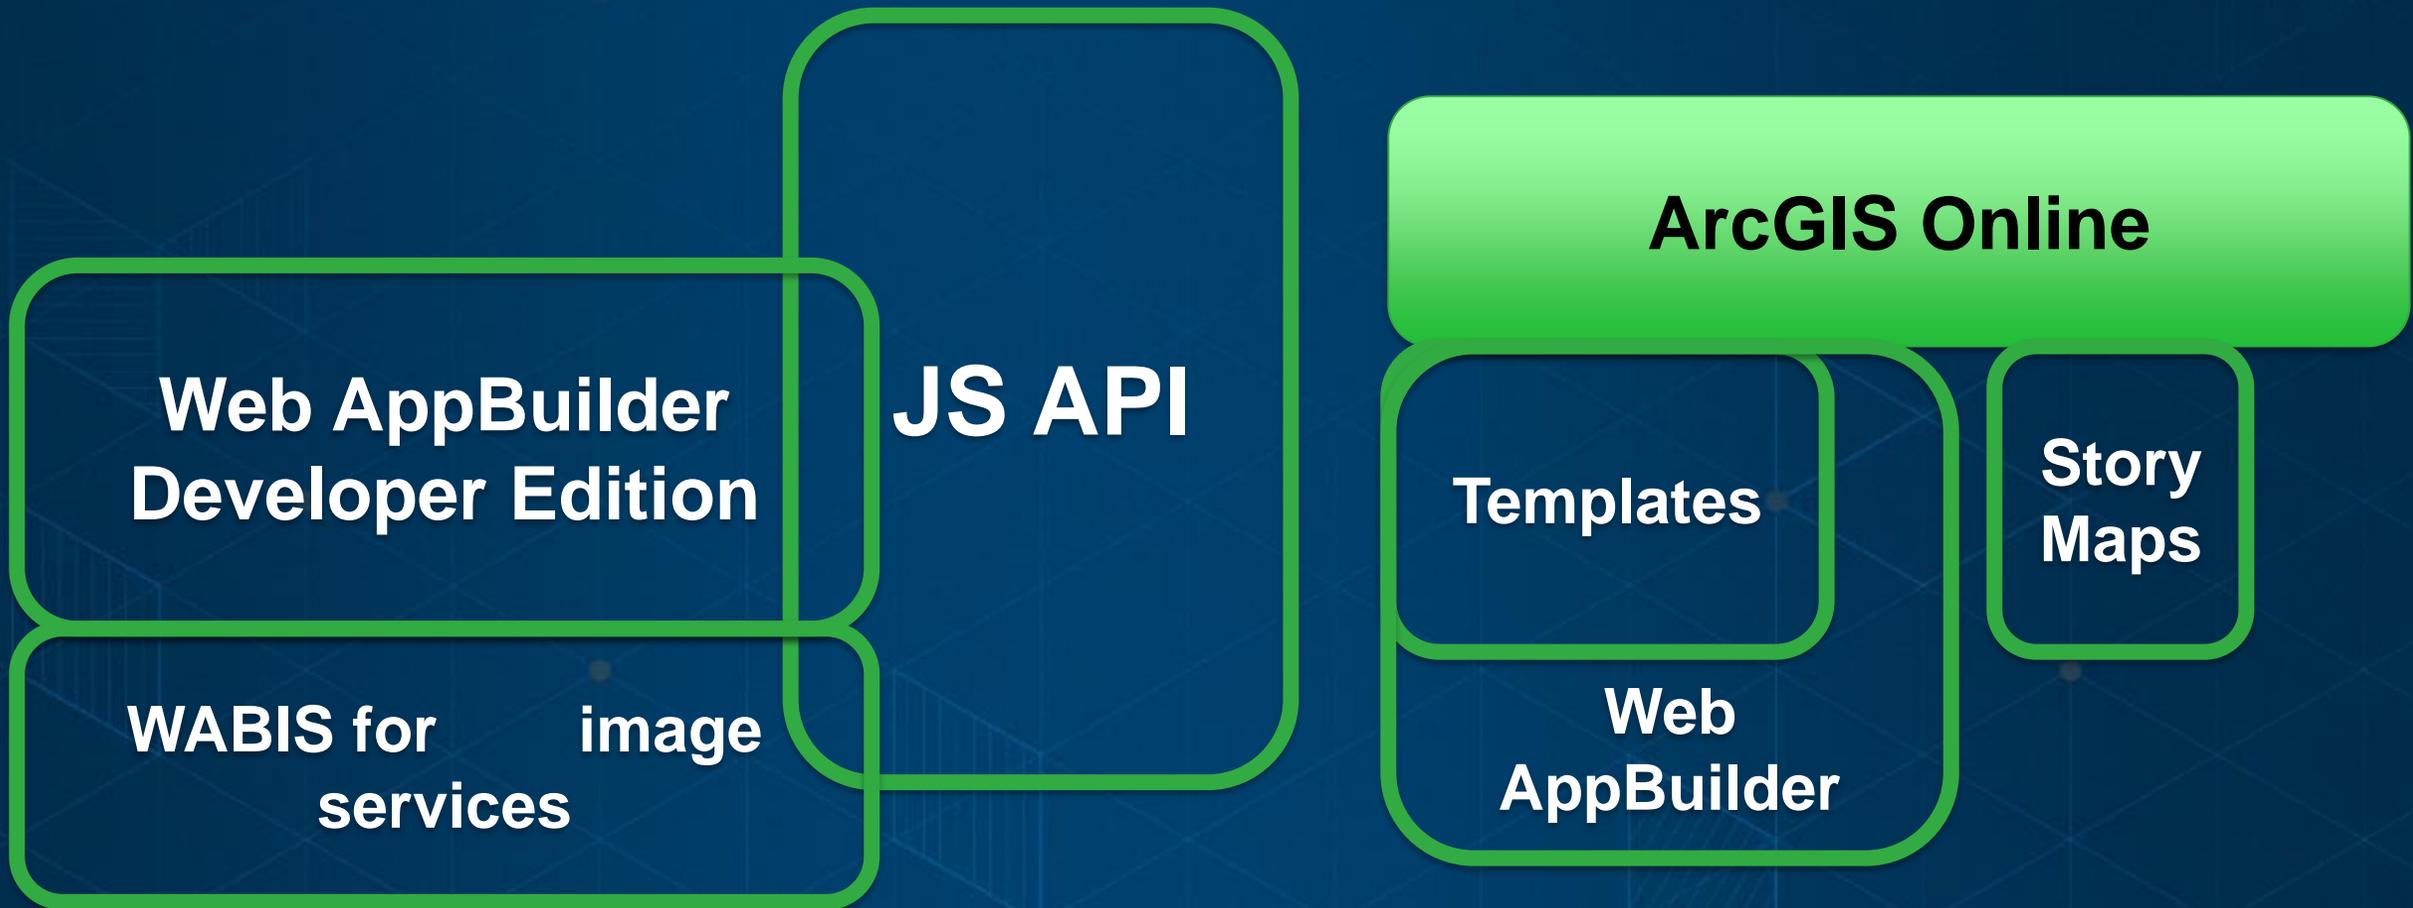

## Installation directory & files for APPathon

# The different working environments to create web apps

# Introduction

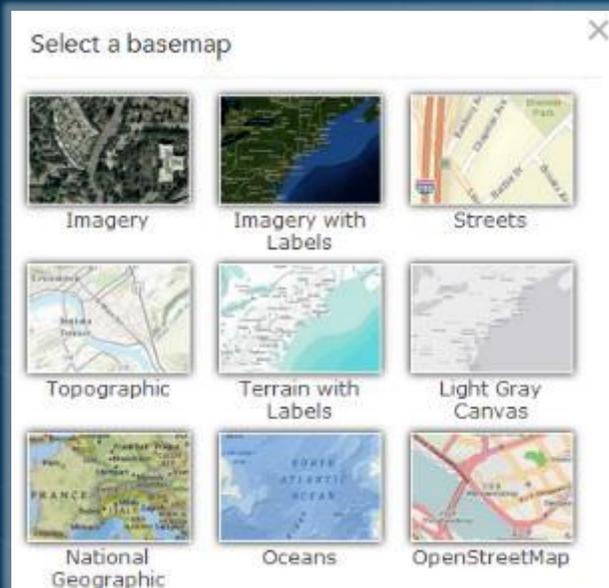

# Workshop sections

- **ArcGIS Online**
  - Web Maps
  - Sharing as Apps
  - Configurable App Templates
  - Web AppBuilder via AGOL
  - Customizing/Extending a Template
- **Web AppBuilder Developer Edition**
- **Image Service widgets (WABIS) on GitHub**

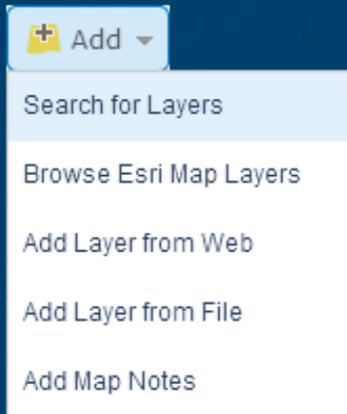

# Web Apps through ArcGIS Online

# Make a Web Map – the fundamental input to a Web App

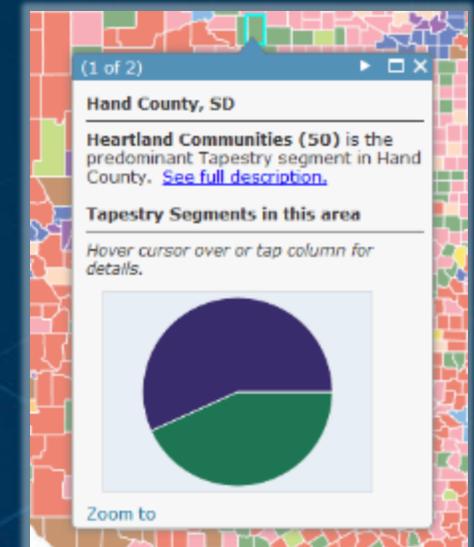

(1) Choose basemap

(2) Add layers...

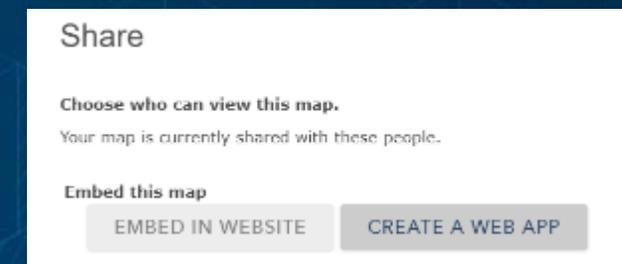

(3) Configure / style

(4) Save and Share

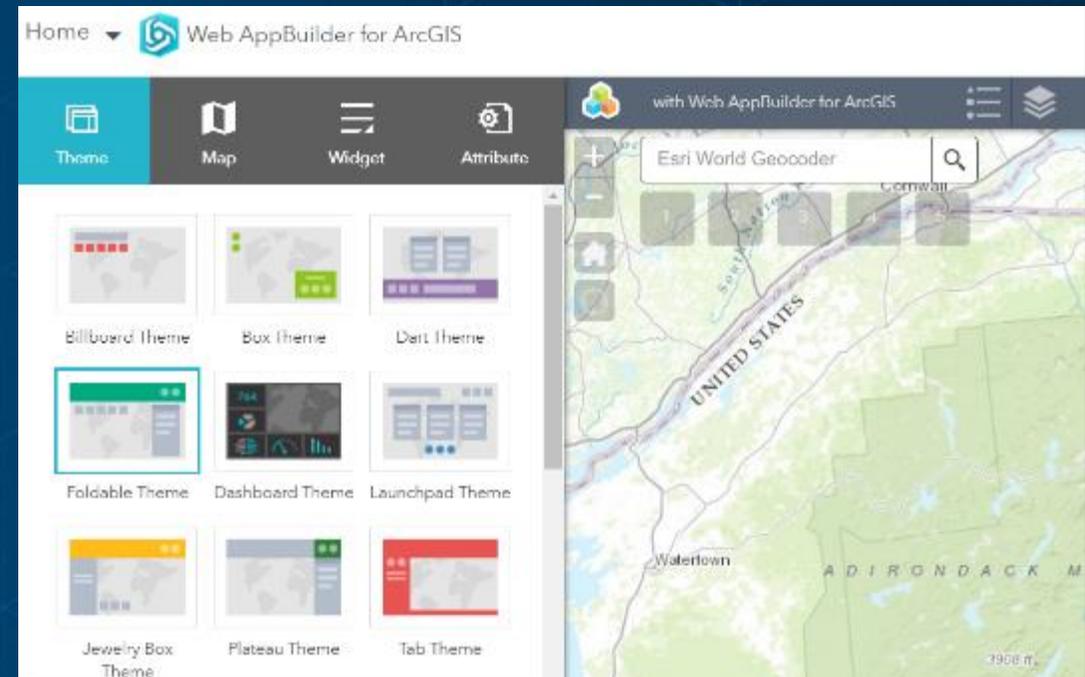

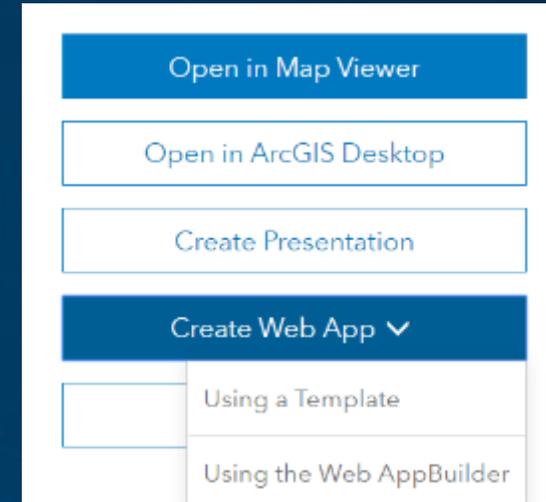

(5) Create App (Optional)

## 2 ways to create apps *built into* AGOL

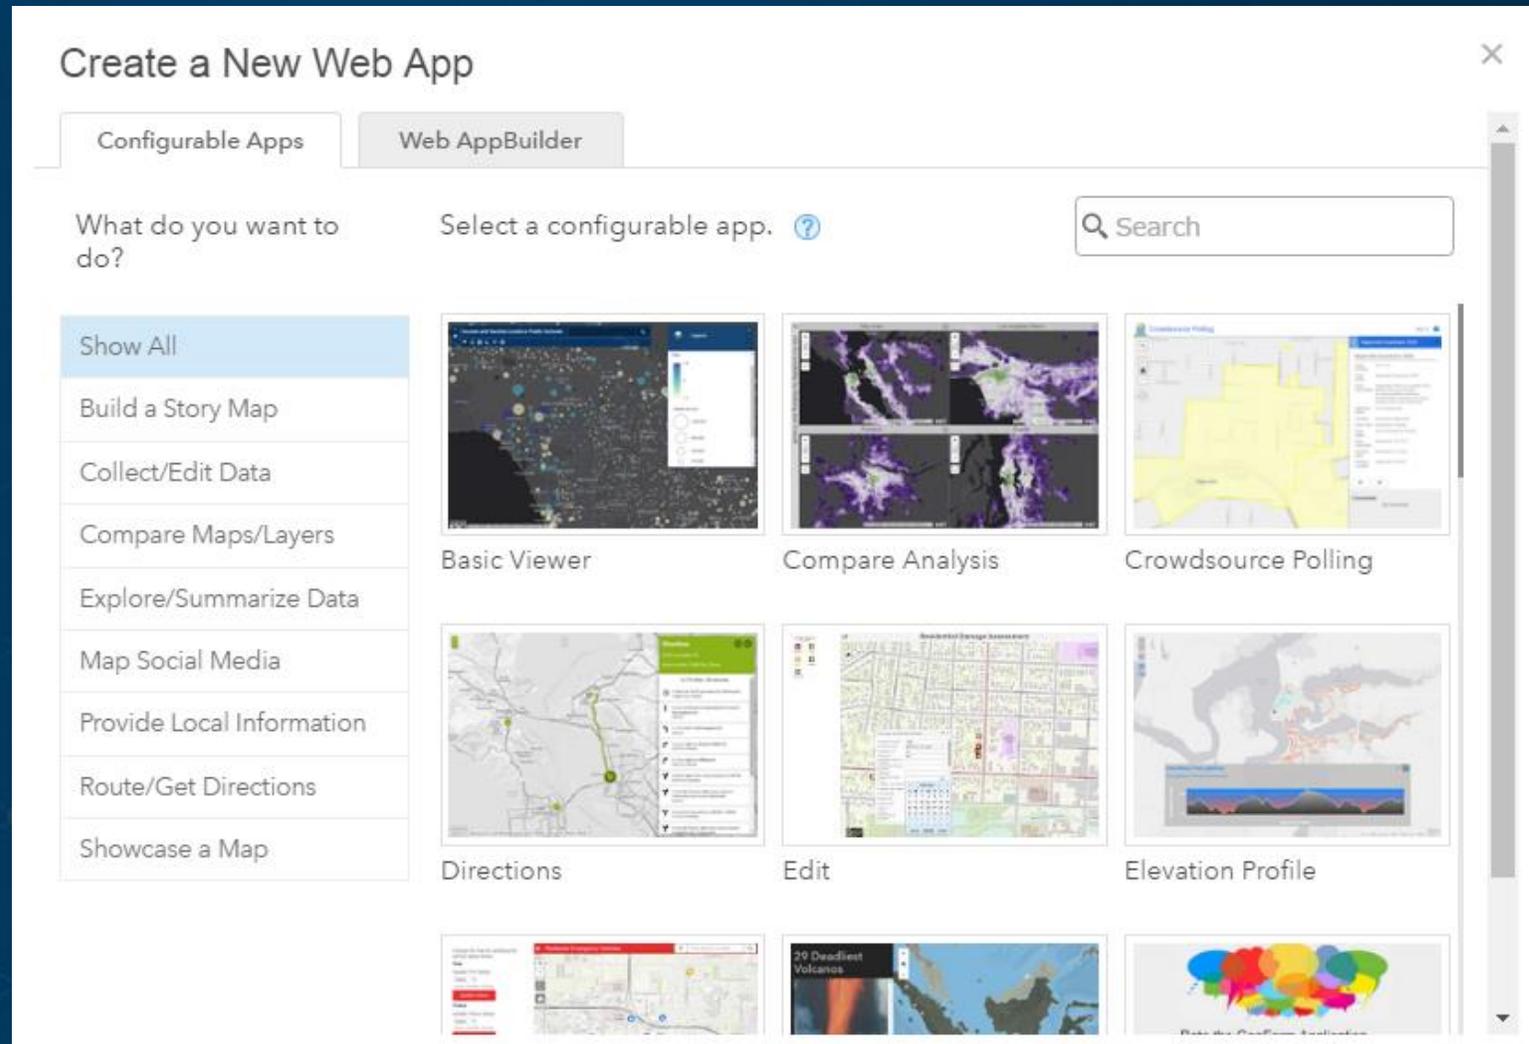

- **Templates**
  - A good place to start...
- **Web AppBuilder**
  - From ArcGIS Online

# Web App Templates

<http://doc.arcgis.com/en/arcgis-online/create-maps/choose-configurable-app.htm>

# Types of Web App Templates

Templates for imagery coming in the future

# What if I need functions from 2 or more of these templates?!?

You need Web AppBuilder

- Similar workflow
- 20 + widgets
- WYSIWYG configuration
- Same hosting options

Builder

Widgets

Web AppBuilder

HTML5/JavaScript

# What if I want to change one of these templates?!?

- **Download from GitHub**
- **Modify using Web AppBuilder**

Web App Builder Developer Edition  
and  
the Image Service Widgets (WABIS)

# Web App Builder Developer Edition

- **Download from <https://developers.arcgis.com/web-appbuilder/>**
  - (or copy from USB drives in APPathon room)
- **Installation & Configuration**
  - See workshop handout "[Install\\_WebAppBuilder\\_IMF2017.pdf](#)"
- **Few widgets focused on imagery**
  - ...thus the need for *WABIS* (Web AppBuilder for Image Services)

# Web AppBuilder Image Service Widgets - *WABIS*

- Download from <http://esriurl.com/WABIS>
  - (or copy from USB drives in APPathon room)
  - Open "WABIS\_V2\_UserDoc.pdf"

- Add widgets to support common imagery requirements
  - IS Layers
  - IS Image Selector
  - IS Change Detection
  - IS Compare
  - IS Display Order
  - IS Display Parameters
    - (formerly IS Parameters)
  - IS Export
  - IS Image Date
  - IS Profile
    - (formerly IS Spectral Profile)
  - IS Renderer
  - IS Scatterplot
    - (formerly Scatterplot)

## 3 sample apps - to build during APPathon

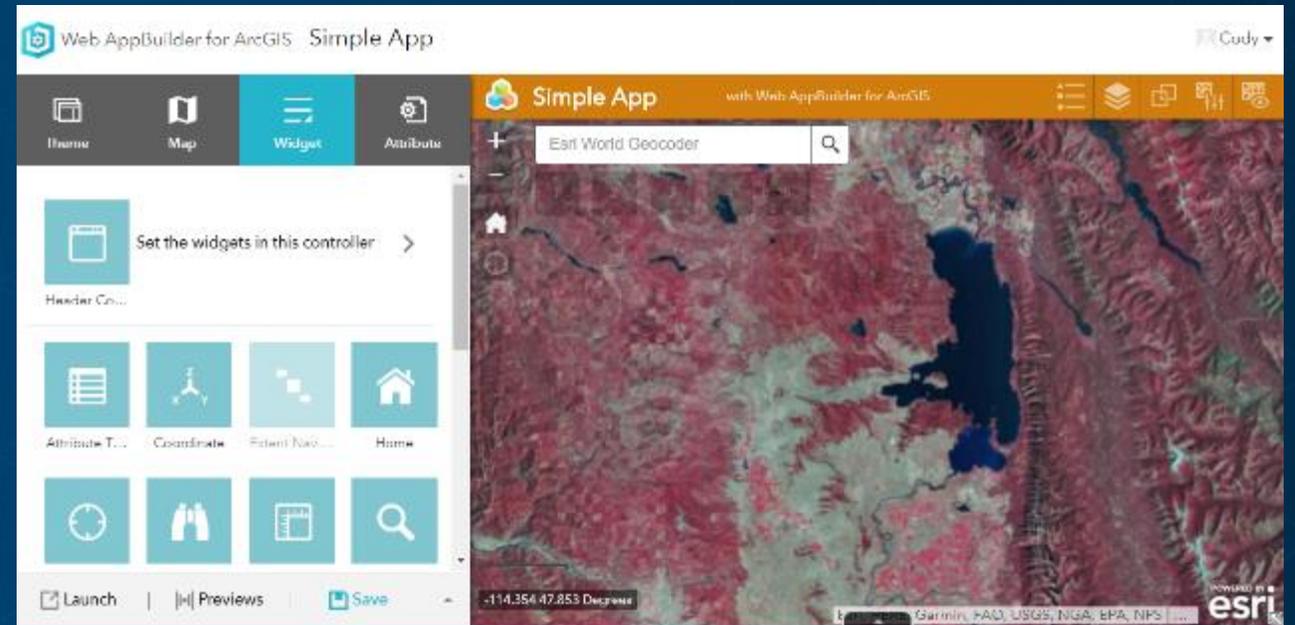

- Simple image access & display
- Image Analysis app
- Change detection app
- Input to Web App = Web Map
  - Two ready-made web maps provided in ArcGIS Online Organization
  - Optional: Create your own

# Image Service: simple access, display, manipulation

- Use web map **WABIS NAIP**

- Add Widgets:

- IS Renderer
- IS Display order (Mosaic method)
- IS Display Parameters (interp & compression)
- IS Layers

# Image Analysis app

- Use web map **WABIS NAIP**
- Add Widgets:
  - IS ImageDate
  - IS Profile widget, 3 modes
    - Spectral
    - Temporal
    - Index
  - IS Scatterplot
